

### **Minor Upgrade to Club Web Site**

The Club's official site has undergone a bit of a facelift to keep it fresh and useful to members and non-members. The History page was seldom visited so it has been scrapped and most of the information that was on it has been incorporated into the front page. A new page has been created called News Releases that will contain news headlines relating to events of significance at the club. A selection of 2005 events and all the main news events of 2006 are shown. Each headline is linked to a PDF document that contains the full article, and in some cases photos.
